

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

Build empathy

The information you add here should be representative of the observations and research you've done about your users.

Says

What have we heard them say? What can we magine them saying?

> Software for recruiters and employers to track candidates throughout the recruiting and hiring process.

> > It saves a lot of time compared to conventional application processing and hiring procedures.

> > > Helps you to

speed up

candidate

management and

significantly

reduce time-to-fill.

Always look for

guarantees and

ensure that all

the interactions

are protected by

passwords.

Increase visibility into the hiring cycle for the entire recruiting team

Lets you upload your job openings on several platforms with a single click.

Thinks

What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

> Creates opportunities to automate manual processes

Helps in making better and faster decisions.
